Computer Engineer

WORK EXPERIENCE

NetSirv
2025 - Present

Junior Software Developer

In this position, I would work under project lead polishing code, updating outdated methods, improve UI and usability, and make updates fixing bugs and improving optimization . I also am tasked with creating API's to automate out companies processes to speed up development.

LocalMotion
2025 - Present

Junior Application Developer

In this position, I would model and design apps to be used by different companies to improve their existing CRM capabilities, employee management, and workflow. I also worked on UI design and functionality.

Witta Creative Studios
2023 - 2024

3D Artist

During my work at Witta Creative Studios I was tasked with rigging and animating product models for use of advertisement and promotion.

EDUCATION

Arizona State University Fulton
2022-Present

CSE & Informatics with Game Development Focus

During my time at Arizona State University's Fulton School of Engineering, I have learned important skills to model, build, and deploy my own software and applications for use on the field or for entertainment.

Minnetonka High School

GED with Computer Technician Focus

During my years at Minnetonka High School in Minnetonka, Minnesota, I put my efforts into taking hands on courses providing certifications in computer repair, and computer networking, both awarded at end of term.
